Golden 50: labeling guide and worksheet

Spotify review pipeline, final assignment. Label each review from its text only. This sheet shows no model labels or drafts, so your answers are independent human labels.

How to submit your labels

1. Label on this sheet (print it or annotate it on a tablet), or go straight to the form.
2. Enter the answers in the one-page form: run `.venv/bin/python tools/label_form.py` in the project folder and open http://localhost:8765. Pick from the dropdowns. It saves automatically to `evals/golden_50_human.csv`.
3. Put your name in the box at the top of the form. Finish when the counter reads 50 / 50 complete.

Also: real API spend (for the cost report)

console.anthropic.com → the organization with the key ending …LgAA → Usage / Cost → date range Oct 6 – Oct 14, 2026 → write down the total in USD (and the split by model if it is shown): $ _____

Topic: pick one, the most severe specific problem (tie: the first one mentioned)

#	Topic	Use for
1	access	login, signup, password, account access, hacked or locked account
2	usability	navigation, controls, layout/redesign, queue/playlist management, shuffle/repeat, ad interruptions
3	playback	crashes, won't open, lag, songs stopping or skipping, connection, audio quality, battery/data, car/Bluetooth
4	downloads	downloading, offline listening, saved music disappearing
5	catalog	missing songs/artists, search, recommendations, lyrics availability, podcast content
6	billing	price, charges, subscriptions, refunds, paywalls; controls locked behind Premium
7	support	contacting customer support and its response
8	other	general praise or criticism with no specific feature; unrelated or meaningless text

• Positive review: choose the first specific praised feature. "Great app" is other.
• Mentioning a paid plan alone is not billing. A subscription failing to activate is billing. A crash for a paying user is playback.
• "Bad update" or "worst app" with no feature named is other.

Intent: the first one that applies wins

#	Intent	Meaning
1	cancellation	explicitly leaving, uninstalling, cancelling, switching, or threatening to
2	complaint	any negative experience, including mixed praise and criticism
3	request	asks for a change or feature without reporting a failure
4	praise	positive, with no complaint or request
5	unclear	meaningless, unrelated, or bare boycott/political slogans with no product complaint

Severity (1–5) and sentiment (−1 to +1)

Sev.	Meaning	Example
1	no problem: praise, unclear text, or a pure feature request	"Good"; "Please add a sleep timer"
2	dislike, generic criticism, minor annoyance	"Worst update"; "ads every two songs"
3	degraded or restricted function, some use left	"Need premium to repeat a song"; "crashes sometimes"
4	core task clearly blocked	"Can't log in"; "app won't open"
5	explicit serious money, privacy or data harm	"Charged twice, no refund"; "account hacked"

Ignore the star rating. Angry words, a crash alone, or cancellation intent do not raise severity by themselves. Sentiment: −1 very negative · 0 neutral or mixed · +1 very positive. If two answers both seem right, mark ambiguous and write the other acceptable label.

Worksheet: 50 reviews

Codes: Topic 1–8 · Intent 1–5 · Severity 1–5 · Sentiment −1..+1 · Amb = ambiguous (✓ plus the other acceptable label). [emoji] marks where the original review had an emoji.

1. Staff must be full of mentally ill kool-aid heads. Banning conservative music that speaks truth. Spotify is doing all they can to protect pedophiles, by banning Christian songs discussing the path the devil leads you down. Pride is a sin.

Topic	Intent	Severity	Sentiment	Amb / also OK	Note

12. Update: I reached out to Spotify Support and with some help from Sarah I was able to get the app working again. Old Post:Normally, the app works great, and I use it constantly. I tried to open it today, and it keeps crashing every time. I've tried uninstalling and reinstalling, and updating. Nothing seems to work unfortunately.

28. Unconditional love, Stoli Canales

id f4c8146a…

Topic	Intent	Severity	Sentiment	Amb / also OK	Note

29. Deleting this App. The new update suck, we can't choose our fvrt songs after some clicks, we can't CHOOSE song after a song played, and we can't turn off shuffle option. They are pushing us to upgrade to Premium subscription. No wonder if you guys loose ratings and users. Anyway i am deleting this app after years of using.

id 3ddb3f4e…

Topic	Intent	Severity	Sentiment	Amb / also OK	Note

30. It's my best music app but now it's not...everything basic features is premium....

id 16d640e9…
